Workshop/Labs (Hands-On Practical Labs)

Title	Topics Covered	Labs
Getting Started	Why, What & How about Docker?(slides)	-
Docker Core Concepts	Concepts of Docker Image, Containers, Multi-container apps	-
Docker for Beginner	Docker Image, Container, Dockerfile, Volumes, Networking	40
Docker for Intermediate	Docker Compose, Swarm, Advanced Networking	50
Docker for Advanced	Docker Security, Content Trust, Image Scanning, Swarm Mode Security	31
Docker Desktop	Docker Dashboard, Dev Environments, Extensions	5

Latest Docker Desktop Features and Demos

Title	Topics Covered	Category	Labs
Docker Scout	Scout CLI, Scout Sample Demo	Security	2
Docker Extensions	Docker Extensions	Development Tools	1
Docker init	Dockerfile, Compose, Python, Go, Rust, Node	Developer Tools	5
Docker init for Python	Dockerfile, Compose, Python	Developer Tools	1
Docker init for Go	Dockerfile, Compose, Go	Developer Tools	1
Docker init for Rust	Dockerfile, Compose, Rust	Developer Tools	1

Title	Topics Covered	Category	Labs
Docker init for ASP.NET	Dockerfile, Compose, .NET	Developer Tools	1
Docker init for PHP	Dockerfile, Compose, PHP	Developer Tools	1
Compose Watch	Compose, Sync, Rebuild	Developer Tools	1
Compose Include	Compose, Include	Developer Tools	1
Compose Profile	Compose, Profile, Staging, Prod	Developer Tools	1

Industry Use cases

Title	Topics Covered	Labs
Docker for AI	Docker for Data Scientist	1
Docker for Leading IDEs	Developer IDEs	Not Started
Docker for Financial Service	-	Not Started
Docker for Healthcare	-	Not Started

Containerd Blogs & Resources

Title	Topics Covered	Labs
What is Containerd and what problems does it solve	-	Not Started
Containerd and Kubernetes	-	Not Started
How To Run Containerd On Docker Desktop	-	Not Started
Getting Started With Containerd 2.0	-	Not Started
Containerd Vs Docker: What's the difference?	-	Not Started

Docker WorkShop for Beginners

Pre-requisite:

- [Creating Your DockerHub Account](#)

Getting Started with Docker Image

- [Running Hello World Example](#)
- [Working with Docker Image](#)
- [Saving Images and Containers as Tar Files for Sharing](#)
- [Building Your First Alpine Docker Image and Push it to DockerHub](#)

Accessing & Managing Docker Container

- Accessing the Container Shell
- Running a Command inside running Container
- Managing Docker Containers

Getting Started with Dockerfile

- What is Dockerfile
- Understanding Layering Concept with Dockerfile
- Creating Docker Image with
 - Lab #1: Installing GIT
 - Lab #2: ADD instruction
 - Lab #3: COPY instruction
 - Lab #4: CMD instruction
 - Lab #5: ENTRYPOINT instruction
 - Lab #6: WORKDIR instruction
 - Lab #7: RUN instruction
 - Lab #8: ARG instruction
 - Lab #9: ENV instruction
 - Lab #10: VOLUME instruction
 - Lab #11: EXPOSE instruction
 - Lab #12: LABEL instruction
 - Lab #13: ONBUILD instruction
 - Lab #14: HEALTHCHECK instruction
 - Lab #15: SHELL instruction
 - Lab #16: Entrypoint Vs RUN
 - Lab #17: USER instruction
- Writing Dockerfile with Hello Python Script Added

Creating Private Docker Registry

- Building a Private Docker Registry
- Building a Private Docker Registry with UI

Docker Volumes

- Managing volumes through Docker CLI
- Creating Volume Mount from **docker run** command & sharing same Volume Mounts among multiple containers

Docker Networking

- The docker network Command
- Lab #1: Listing the Networks
- Lab #2: Inspecting a Network
- Lab #3: List network driver plugins
- Lab #4: Docker Bridge Networking

- Lab #5: Basics of Docker Bridge Networking
- Lab #6: Connect a Docker container to bridge network
- Lab #7: Test Network Connectivity
- Lab #8: Configure NAT for external connectivity

Docker Workshop for Intermediate Users

Docker Compose

- Compose101 Slides
- Introduction to Docker Compose
- Dockerfile Vs Docker compose
- How to Install Docker Compose?
 - Lab #1: `version` Command
 - Lab #2: `help` Command
 - Lab #3: `Config` Command
 - Lab #4: `Build` Command
 - Lab #5: `Pull` Command
 - Lab #6: `Push` Command
 - Lab #7: `up` Command
 - Lab #8: `Images` Command
 - Lab #9: `ps` Command
 - Lab #10: `Stop` Command
 - Lab #11: `Start` Command
 - Lab #12: `Restart` Command
 - Lab #13: `pause` Command
 - Lab #14: `Unpause` Command
 - Lab #15: `Logs` Command
 - Lab #16: `Port` Command
 - Lab #17: `Run` Command
 - Lab #18: `Scale` Command
 - Lab #19: `Exec` Command
 - Lab #20: `Kill` Command
 - Lab #21: `Rm` Command
 - Lab #22: `Down` Command
- Create first docker compose file with nginx and mysql
- Use JSON instead of YAML compose file in Docker?
- A Simple Wordpress Application running on Single Node using Docker Compose

Docker Swarm

Introduction to Docker Swarm

- What is Docker Swarm
- Docker Swarm : Terminology

Docker Services | Scaling | Draining Node | Rescheduling Containers

- [Creating 5-Node Docker Swarm Cluster](#)
- [Lab #1: Creating Overlay Network](#)
- [Lab #2: Deploy Services](#)
- [Lab #3: Inspecting Docker Swarm Service States](#)
- [Lab #4: Scaling Docker Swarm Services](#)
- [Lab #5: Deploy the application components as Docker services](#)
- [Lab #6: Drain a node and reschedule the containers](#)
- [Lab #7: Cleaning Up](#)

Docker Networking - II

Overlay Networking

- [Lab #1: Docker Overlay Networking](#)
- [Lab #2: Create an overlay network](#)
- [Lab #3: Create a service](#)
- [Lab #4: Test Service Discovery](#)
- [Lab #5: Test Routing Mesh](#)
- [Lab #6: Test standalone containers in Overlay Network](#)

Implementing MacVLAN

- [Lab #7: Getting Started with MacVLAN](#)

Docker Workshop for Advance Users

Docker Security101

Docker Content Trust

- [Lab01 - Pulling images by tag](#)
- [Lab02 - Pulling images by digest](#)
- [Lab03 - Docker Content Trust](#)
- [Lab04 - Official Images](#)
- [Lab05 - Extra for experts](#)
- [Lab06 - Enable Docker Content Trust](#)
- [Lab07 - Push & Sign an Image](#)
- [Lab08 - Cleaning Up](#)

Docker Secrets Management

- [Lab01- Create a Secret](#)
- [Lab02 - Manage Secrets](#)

- Lab03 - Access the secret within an app
- Lab04 - Clean-up

Docker Secret Management with UCP

- Lab01 - Create a Secret
- Lab02 - Deploy an App
- Lab03 - Test the App
- Lab04 - View the Secret

Docker Network Security

- Lab01 - Create an encrypted overlay network
- Lab02 - List networks
- Lab03 - Deploy a service
- Lab04 - Clean-up

Security Scanning

- Lab01 - Create a private Hub repo
- Lab02 - Pull an image
- Lab03 - Tag and push an image
- Lab04 - View scan results
- Lab05 - Clean-up

Swarm Mode Security

- Lab01- Create a new Swarm
- Lab02 - Add a new Manager
- Lab03 - Add a new Worker
- Lab04 - Rotate Join Keys
- Lab05 - View certificates
- Lab06 - Rotate certificates

Concepts and Terminologies (Beginners to Advance)

- Docker for Beginners
- Docker for Intermediate
- Docker for Advanced
- Docker Cheatsheet
- Docker Certificate Associate Exam Preparation
- Docker Interview Questions

Sample App

We recommend you to visit [Docker Awesome Compose Repository](#) in order to find the Compose files for running sample apps
